DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/154,909, filed on 5/28/02. This communication is responsive to your preliminary amendment filed 2/26/04. Claims 8-10 and 12-14 are currently pending in this application. Claims 1-7, 11 and 15-22 have been cancelled.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 8-10 and 12-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are narrative in general and contain language such as "may be" and "such as". Applicant is urged to revise the claim language to conform with US practice.

See MPEP § 2173.05(d).

Election/Restrictions

5.- Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

7. Claims 8-10 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Howards Koritzinsky et al. (Koritzinsky).

Koritzinsky discloses a medical system services interface. Applicant's attention is directed to Fig. 1 and corresponding description. Different imaging systems such as a MRI system 14 and a CT system are connected to servers such as 30 and 46 for the control of those imaging systems. The servers are in turn connected to a network 80. Note that each of the apparatuses have different client/server configurations.

Koritzinsky meets all the limitations of the claims at issue in their present form.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Debbins et al., Ross et al., and Takeo et al. all disclose imaging systems. Note the abstract of each disclosure.
